DELIVERING ON UTS'S COMMITMENT TO EQUITY AND SOCIAL JUSTICE

“Social Justice and inclusiveness is explicit in our curriculum, policies, strategies and plans and in our culture, beliefs, values and ways of working”

UTS Strategic Objectives and Outcomes Statements 2014-2018

UTS has made a major commitment to equity and social justice. Actively participating in the free dissemination of high quality research through open access publishing is a tangible example of UTS's contribution to these values.

UTS ePRESS contributes to the advancement of knowledge and education by publishing scholarly works on critical social issues, and making the work of UTS and international researchers freely available to a global audience.

“CJLG is one of the few journals that bridges academia and practice for those with an interest in local government in the developing world.... The open access platform is invaluable as many of our readers are based in institutions that would not normally have access to peer reviewed journals”,

Prof. Alison Brown, Cardiff University,
Co-Editor Commonwealth Journal of Local Government

“UTS aims to increase the scale, quality and impact of its research and to develop its reputation for world-leading research”

UTS Strategic Objectives and Outcomes Statements 2014-2018

“My personal experience with the ePress has been overwhelmingly positive - their commitment to ensuring the journal reaches as wide an audience as possible and their support for the ideals of open access publishing that protects high scholarly standards is obvious and effective.....I have worked in academic publishing for fifteen years now, and teach in the Publishing and Communications program at the University of Melbourne [and] in my opinion, the UTS ePress model is one of the few that fulfils the requirements of an academic publisher from all angles. It works to ensure scholarly rigour in its publications, it does so in forms that are accessible and that meet research benchmarks, and it makes them freely available - thus actually read by more than a handful of people. This has to be a good thing.”
